

Suggestions for implementation of the CIE Code of Ethics

To be effective, the CIE Code of Ethics must remain visible and those who choose to participate in CIE technical work should be repeatedly reminded of its principles.

The following are some suggestions to ensure that the importance of the CIE Code of Ethics is regularly emphasized.

- ✓ The CIE Code of Ethics could be included with meeting documentation.
- ✓ DDs/TCCs or whoever chairs a technical meeting could present the CIE Code of Ethics at kick off meetings with a brief presentation of why it is important.
- ✓ The CIE Code of Ethics could be made a standing item on all meeting agendas where the first few minutes of every meeting are spent reviewing its principles.
- ✓ The CIE Code of Ethics could be attached to the meeting attendance lists which are circulated for signature by attendees at physical meetings.
- ✓ Meeting reports should include the details of any discussions on the CIE Code of Ethics.

Any further ideas or good practices on how to maintain the visibility of the CIE Code of Ethics are greatly welcome, as are any questions regarding its contents or implementation. Please send an email to share your thoughts and experiences to ciecb@cie.co.at
